Lab 2: HTML & CSS Refresher

Summary of Efforts (Everett):

This lab was very simple. All my initial issues simply came from remembering formatting and what specific keywords I needed to make changes. I achieved what the lab wanted me to do.

Screenshots (Everett):

1. HTML File:

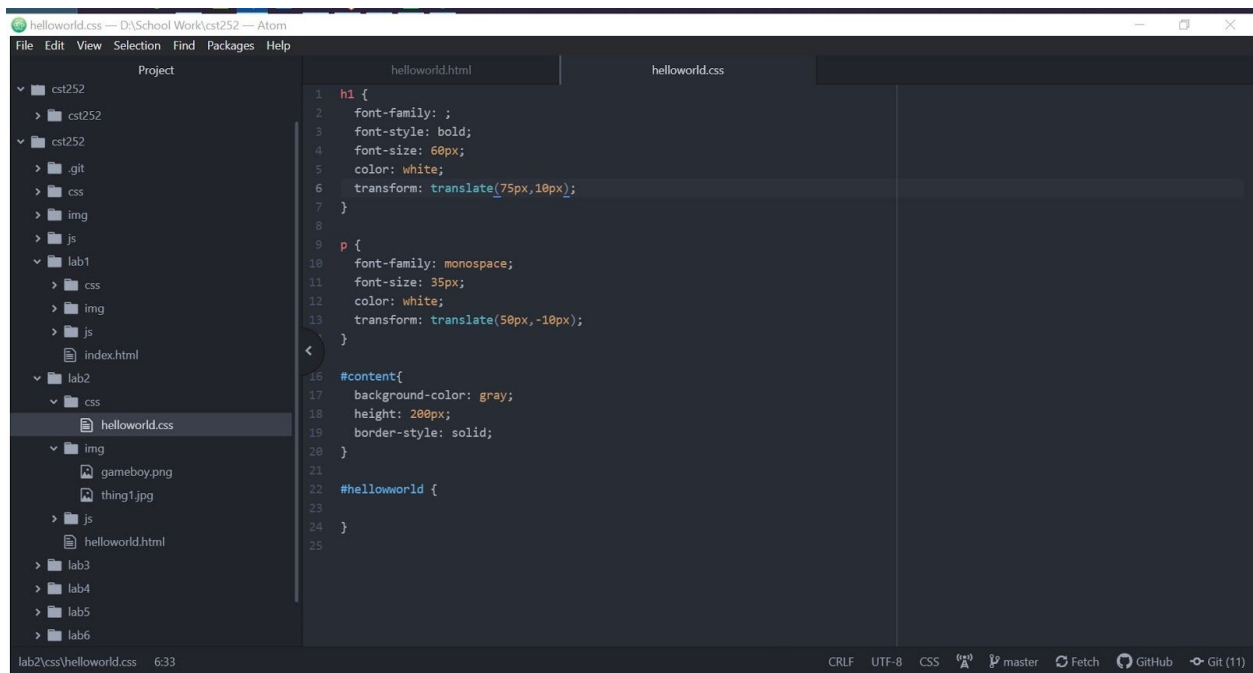

```
1 <!DOCTYPE html>
2 <html>
3 <head>
4   <title>Lab 2 - HTML & CSS Refresher</title>
5   <link rel="stylesheet" type="text/css" href="../css/site.css">
6   <link rel="stylesheet" type="text/css" href="css/helloworld.css">
7 </head>
8 <body>
9   <div id="content">
10    <h1> Hello World. </h1>
11    <p> I am Everett Lomath, I'm partnering with Mirna Gonzalez for this lab. </p>
12  </div>
13 </body>
14 </html>
15
```

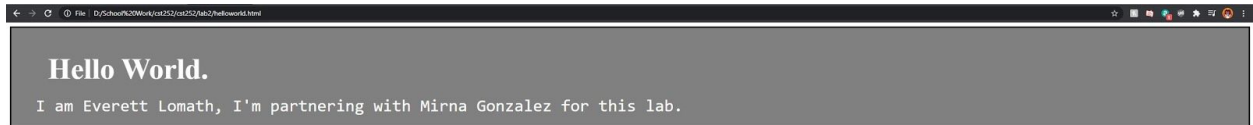

2. HTML Local

3. CSS File

4. HTML W/ CSS Local

5. Local Page Inspect Element

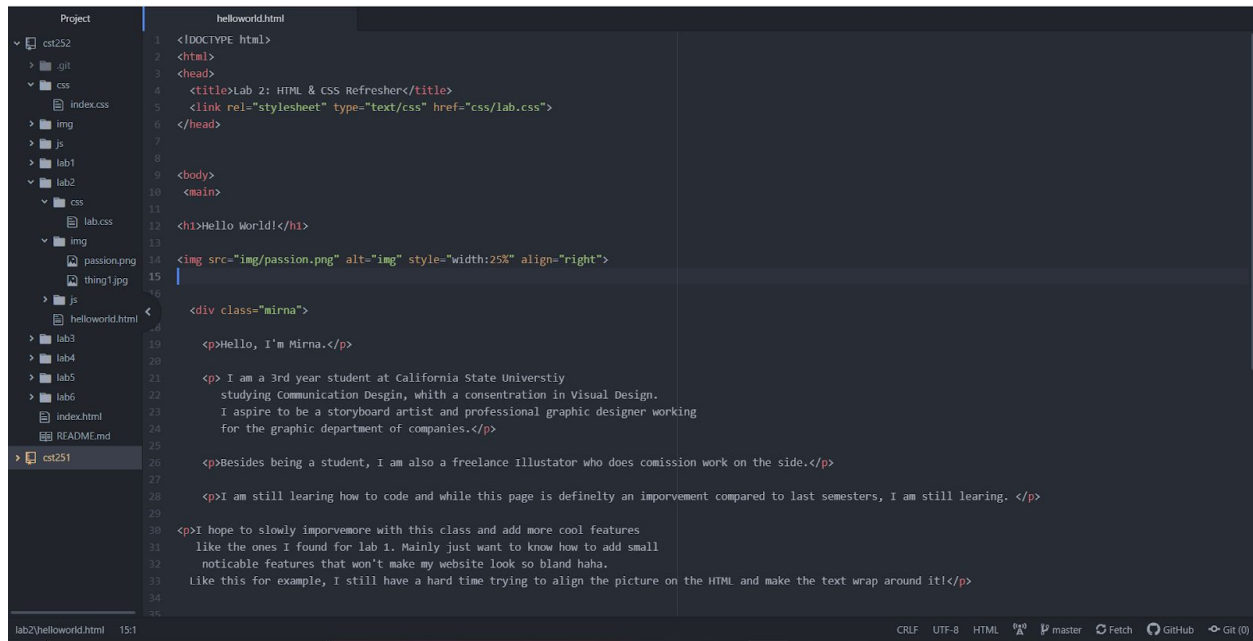

Summary of Efforts (Mirna):

This lab was supposed to be very simple but I kinda went overboard with it. I mean it still is rather basic and simple. Not perfect but acceptable (in my opinion at least). Definitely still difficult to move stuff around and trying to align the picture, but it's all part of the process.

24   color: white;
25   text-align: center;
26 }
27
28 h1{
29   color: black;
30   text-align: center;
31 }
32
33 body{
34   height: 100%;
35   width: auto;
```

Final Look:

Hello World!

Hello, I'm Mirna.

I am a 3rd year student at California State University studying Communication Design, with a concentration in Visual Design. I aspire to be a storyboard artist and professional graphic designer working for the graphic department of companies.

Besides being a student, I am also a freelance illustrator who does commission work on the side.

I am still learning how to code and while this page is definitely an improvement compared to last semesters, I am still learning.

I hope to slowly improve with this class and add more cool features like the ones I found for lab 1. Mainly just want to know how to add small noticeable features that won't make my website look so bland haha. Like this for example, I still have a hard time trying to align the picture on the HTML and make the text wrap around it!
